**Compatible with RadioRA® 2 and HomeWorks® QS dimmers**

# Dimmable CFL & LED bulbs

Compatible with RadioRA® 2 and HomeWorks® QS dimmers

List updated August 1, 2014  
For the most up-to-date list, visit  
[www.lutron.com/dimcflled](http://www.lutron.com/dimcflled).

This list is designed to help you select bulbs that are compatible with Lutron Residential Systems products. The CFL and LED bulbs on this list were extensively tested by Lutron; the Lutron Residential Systems products were evaluated by UL and meet applicable safety standards.

## How to use this list

If you already have a bulb:

Use the “Find” tool in your browser or PDF viewer to search for the model number that’s printed on the bulb. Then choose a Residential Systems product that’s compatible with that bulb.

If you already have a Residential Systems product:

Use the table of contents to find the corresponding pages for that control, and then select a bulb from that list.

## What does “compatible” mean?

Compatible means that the bulbs can be dimmed, although the bulb’s dimming performance may not match what you’re used to seeing when dimming an incandescent or halogen bulb. These bulbs have also been electrically tested to confirm that the control may be used up to its full rated CFL/LED load without affecting the life of the control.

Products on this list are considered compatible with the respective Lutron Residential Systems products. Depending on the quality of the bulb you select, compatible bulbs may still:

- have less dimming range than an incandescent or halogen bulb
- dim less smoothly than an incandescent or halogen bulb
- flicker or shimmer at certain light levels
- buzz

## For more information

If you’d like more information regarding bulb performance and test results, including dimming range, other dimmer options, and performance, please visit [www.lutron.com/ledtool](http://www.lutron.com/ledtool).

Please note: Bulb variations in lamp design and construction affect performance. Bulb manufacturers can modify their bulbs at any time, without notice to Lutron. This prevents Lutron from ensuring ongoing compatibility. For up-to-date specifications, performance, and/or any related recall information about the bulb, please visit the bulb manufacturer’s website.

## How to calculate wattage when mixing lamp types: (example only)

**Total CFL/LED  
Wattage Installed**

3 CFL bulbs x 16 W each  
= **48 W**

**Maximum Allowable  
Incandescent/Halogen Wattage**

6 Incandescent bulbs x 65 W each  
= **390 W**

### Example 1:

1. I have a single-gang dimmer and 3 CFL bulbs that are 16 W each, totaling 48 W.
2. Because I have 48 W of CFL bulbs installed, I can have up to 400 W of incandescent bulbs also controlled by this dimmer (6 incandescent bulbs that are 65 W each = 390 W)

(Please note this example applies to a single-gang dimmer only.)

Single-Gang	Total CFL/LED Wattage Installed		Maximum Allowable Incandescent/Halogen Wattage
	0 W	+	600 W
	1-25 W	+	500 W
	26-50 W	+	400 W
	51-75 W	+	300 W
	76-100 W	+	200 W
	101-125 W	+	100 W
	126-150 W	+	0 W
End of Gang	Total CFL/LED Wattage Installed		Maximum Allowable Incandescent/Halogen Wattage
	0 W	+	500 W
	1-25 W	+	400 W
	26-50 W	+	300 W
	51-75 W	+	200 W
	76-100 W	+	100 W
	101-125 W	+	50 W
	126-150 W	+	0 W
Middle of Gang	Total CFL/LED Wattage Installed		Maximum Allowable Incandescent/Halogen Wattage
	0 W	+	400 W
	1-25 W	+	300 W
	26-50 W	+	200 W
	51-75 W	+	100 W
	76-100 W	+	50 W
	101-125 W	+	0 W
	126-150 W	+	0 W
