

Edge LIGHTING

ABOUT EDGE LIGHTING

From Edge Lighting's beginnings in Monorail systems to our award-winning LED systems of today, Edge Lighting has kept true to its main goal: providing technically superior lighting systems that are easily tailored to create a custom look without the custom cost.

Edge Lighting provides energy-efficient lighting solutions that come from years of research and development. Our passion and attention to detail gives you confidence to design a lighting system that not only fulfills your specific lighting needs but also illuminates beautifully and with minimal maintenance.

WHAT WILL YOU FIND IN THIS CATALOG

The 2013 Edge Lighting Supplement is comprised of our linear LED lighting systems; everything from flexible, LED **Soft Strip**, to **Light Channels**, to brand-new **Cirrus Channels**. The minimal profile and excellent light quality of these systems lends you creative freedom in all types of applications — there is a use for them in most every project, from kitchens and bathrooms to offices and retail spaces.

Edge Lighting's linear LED lighting systems began with LED Soft Strip; a versatile, flexible strip that is ideal for above/under cabinets, shelves, coves, and toe kicks. The linear LED line grew with the Light Channels, comprised of a slim, paintable extrusion that acts as a housing and a heatsink for LED Soft Strip. The Light Channels have a more finished appearance and emit a cleaner line of LED light, eliminating dots.

The Cirrus Channels are the latest addition to the linear LED product collection. The Cirrus line is available in five beautiful finishes with custom anodized or plated finish options. The system offers superior performance. When compared with a T5 HO fluorescent, the DOE Caliper testing found that the Cirrus Channels offer a comparable solution in terms of light output, or, lumens per watt. The Cirrus Line is not only a direct replacement for a T5 in terms of light output, but it comes in a much smaller profile, with no dark spots, and can run seamlessly up to 40 ft.

MADE TO ORDER

Our ordering process allows you to choose precise lengths, such as 2.4 inch increments, you need to accomplish any project. Edge Lighting works here in the USA and guarantees that every linear LED lighting system is cut to order and ships quickly.

A GREEN FUTURE

We understand that saving energy, saving the environment, and saving money are equally as important as quality design.

Edge Lighting and our sister company, Pure Lighting, have been developing fixtures using LEDs for years, giving us the technical expertise that can only come from extensive research and development. Our companies have earned 18 LED awards and continue to receive recognition for industry advancements.

As our capabilities in energy-efficient technologies continue to grow, we are confident we will be able to provide you an LED lighting solution for every application.

SS2P-24V-20-WW
LED Soft Strip

SOFT STRIP

24VDC SYSTEMS (REMOTE POWER SUPPLY)

Edge Lighting's LED Soft Strip is a versatile, flexible, low voltage linear strip perfect for above cabinets, under cabinets, shelves, closets, coves and toe kicks.

Which LED Soft Strip is best for me?

Economy Grade is a lower CRI (75+), more budget-friendly strip. It is available in 1.4 watts or 2.4 watts per foot in very warm white (2700K), warm white (3000K), or RGB and has an average lifespan of 35,000 hours.

Premium Residential Grade produces a richer color with a higher CRI of 80+. It uses 2.3 watts per foot, comes in warm white (3097K), and has an average lifespan of 35,000 hours.

Commercial Grade provides the highest levels of light and superior color rendering with 84+CRI. It uses 2.5 watts per foot, comes in very warm white (2700K) and warm white (3000K) and has an average lifespan of 50,000 hours.

Even Illumination

- Edge Lighting Soft Strip uses twice the amount of copper to prevent light loss at the end of a run
- More LEDs per foot for even illumination
- Tight binning for a more consistent white color

State-Of-The-Art Components

- Pairing the LED Soft Strip with the exclusive DC power supply, the TEB-75L-24DC, allows the system to produce twice the amount of light while using the same amount of energy as AC systems
- Dims down to 10% using a standard electronic low-voltage dimmer without flickering

Design Custom Shapes and Sizes

- Seamless plug-in connectors
- Run up to 40 feet on a 24V system before re-feeding

SS1 SOFT STRIP 1.4W, 24V LOW OUTPUT, CRI (75+) ECONOMY GRADE

Description:

Soft Strip (SS1) provides accent light with warm white or very warm white LEDs. At less than a 3/8" wide, the flexible copper strip, with an optically clear protective coating, is sold in 1 ft increments up to 32 ft with easy plug-in connectors on each end. Includes a 6 ft power feed cable. For custom lengths, smaller segments are available in 4 inch increments (sold separately). Use plug-in flexible connectors for making turns and custom configurations. At only 1.4 watts per foot, the economical system dims with a standard electronic low-voltage dimmer using the TEB-75L-24DC power supply, Edge Lighting's exclusive electronic powers supply. Self-adhering SS1 mounts to most smooth finished surfaces with the industrial strength 3M tape (provided on back of strip); some unfinished surfaces may require screw-in mounting clips (sold separately). Designed for indoor, open-air environments, SS1 includes a flexible aluminum heat sink to extend LED life. Fixtures include 5-year warranty.

Applications:

Indoor Only - Inside cabinet, wine cellar, steps, behind mirrors, handrails, inside drawers, niches and toe kicks. ETL listed to conform to UL 2108 for closet and under-cabinet applications.

Lamp:

18 warm white (3050K) or very warm white (2660K) LEDs per foot, 75+ CRI
 Warm White: 74 lumens per foot
 LED lamps consume 1.4 watts per foot at 24VDC

Average Lamp Life:

32,000 hours

Power Supply:

75 watt, 120 volt input, 24 volt DC output **TEB-75L-24DC**, 96 watt, **PSB-96W-010-24VDC** or 192 watt, **PSB-2X96W-010-24VDC** (visit www.edgelighting.com for additional power supplies)

SS2P SOFT STRIP 2.3W, 24V HIGH OUTPUT, CRI (80+) PREMIUM RESIDENTIAL GRADE

Description:

Premium 24 volt Soft Strip (SS2P) provides high levels of light with 80+ CRI warm white LEDs, offering superior color rendering and enhanced color in the space. The LEDs are distributed close together throughout the strip for uniform light distribution without hotspots. The 1/2" wide flexible copper strip, with an optically clear protective coating, is sold in 1 ft increments up to 25 ft with easy plug-in connectors on each end. Includes a 6 ft power feed cable. For custom lengths, smaller segments are available in 2.4 inch increments (sold separately). Use plug-in flexible connectors for making turns and custom configurations. At only 2.3 LED watts per foot, the system dims with a standard electronic low-voltage dimmer when using the TEB-75L-24DC power supply, Edge Lighting's exclusive electronic powers supply. Self-adhering SS2P mounts to most smooth finished surfaces with the industrial strength 3M tape (provided on back of strip); some unfinished surfaces may require screw-in mounting clips (sold separately). Designed for indoor, open-air environments, SS2P includes a flexible aluminum heat sink to extend LED life. Fixtures include 5 year warranty.

Applications:

Indoor Only - Task lighting, under/above cabinet, cove, retail clothing, work stations, closets, wine cellars and toe kicks. ETL listed to conform to UL 2108 for closet and under-cabinet applications.

SS2C SOFT STRIP 2.5W, 24V HIGH OUTPUT, CRI (82+) PREMIUM COMMERCIAL GRADE

Description:

Commercial-grade 24 volt Soft Strip provides high levels of light with 82+ CRI warm-white LEDs, offering superior color rendering and enhanced color in the space. The LEDs are distributed close together throughout the strip for uniform light distribution without hotspots. The 1/2" wide flexible copper strip, with an optically clear protective coating, is sold in 1 ft increments up to 40 ft with easy plug-in connectors on each end. Includes a 6 ft power feed cable. For custom lengths, smaller segments are available in 2.4 inch (5 x 2.4" = 1ft) increments (sold separately). Use plug-in flexible connectors for making turns and custom configurations. At only 2.5 watts per foot, the 24 volt system dims with a 0-10V controller when using a 96 or 192 watt power supply. Self-adhering SS2C mounts to most smooth finished surfaces with the industrial strength 3M tape (provided on back of strip); some unfinished surfaces may require screw-in mounting clips (sold separately). Designed for indoor, open-air environments, SS2C includes a flexible aluminum heat sink to extend LED life. Fixtures include 5 year warranty.

Applications:

Indoor Only - Cove, retail, hotel and display. ETL listed to conform to UL 2108 for closet and under-cabinet applications.

Lamp:

SOFT STRIP HEAT SINK REFLECTORS

How To Best Use Soft Strip

In the examples below, Soft Strip is used to highlight objects on shelves. Use SS2P or SS3 for an extra punch of light above and below cabinets and in coves. SS2P has a high CRI of 80+ to bring out the best color in the space. A flat aluminum heat sink is provided with all strips to give you extra long life. Use different Heat Sink Reflectors depending on the application.

Foot Candle Guidelines

When selecting appropriate light fixtures for an environment, it is important to provide adequate light levels. The examples in photos below show the amount of light each lamp provides at various distances and aiming angles. The chart below gives some common examples of adequate light levels for typical environments and tasks.

FC	500	300	200	150	100	75	50	30	20	15	10	7.5	5	3	2
HOUSE	Sewing		Reading Kitchen		Make-Up Grooming		Dining Table		Recreation Activities		Washing Lavatory

STORE	Forefront of Store Windows		Show Window		Elevator		Display Stand		Stairs		Indoors		Parking		

SS1-24V-_-WW 1.4 watts per foot

SS2P-24V-_-WW 2.3 watts per foot & SS3-24V-_-WW 2.4 watts per foot

Correlated Color Temperature (CCT)

CCT describes the relative color appearance of a white light source, indicating whether it appears more yellow/gold or more blue, in terms of the range of available shades of white. CCT is displayed in Kelvin (K).

Color Rendering Index (CRI)

CRI indicates how well a light source renders colors, on a scale of 0 to 100, compared to a reference light source of similar color temperature. The test procedure established by the International Commission on Illumination (CIE) involves measuring the extent to which a series of eight standardized color samples differ in appearance when illuminated under a given light source.

Under Cabinets

The small profile of Soft Strip easily conceals under cabinets. Add even illumination to objects on counter tops and back splash with any of the Soft Strip versions. Eliminate reflected lamp image in stone and other high-gloss counter tops by using horizontal mounting extrusion SS-HR-L.

Straight Goof Connector

Use Goof Connectors to correct some installation errors. If a segment of Soft Strip is accidentally cut, the straight goof connectors may rejoin segments in some cases.

PRODUCT	TYPE	CONNECTOR

SS3 RGB SOFT STRIP 2.6W, 24VDC HIGH OUTPUT, RGB

Description:

Soft Strip (SS3) RGB provides dynamic color effects with red, green and blue LEDs. The 1/2" wide flexible copper strip, with an optically clear protective coating, is sold in 1 ft increments up to 36 ft with easy plug-in connectors on each end. Includes a 6 ft power feed cable. For custom lengths, smaller segments are available in 4 inch increments (sold separately). Use plug-in flexible connectors for making turns and custom configurations. At only 2.6 watts per foot, the system can be controlled using a compatible RGB 24 volt DC power supply with integrated RGB DMX driver. Self-adhering SS3 mounts to most smooth finished surfaces with the industrial strength 3M tape (provided on back of strip); some unfinished surfaces may require screw-in mounting clips (sold separately). Designed for indoor, open-air environments, SS3 includes a flexible aluminum heat sink to extend LED life. Fixtures include 5 year warranty.

Applications:

Indoor Only - Under/above cabinet, cove lighting or accent toe kicks, behind sheer curtains, step, entertainment, display, night clubs, molding accent, media room

Lamp:

18 RGB LEDs per foot
LED lamps consume 2.6 watts per foot

Average Lamp Life:

32,000 hours

Indirect LED Lighting System for Residential Environments

Page 18

Soft Line Indirect LED Lighting System - Featuring Soft Strip

Soft Line is an indirect lighting installation that can use white, RGB or both versions of LED Soft Strip to provide soft, ambient, indirect illumination for decorative and architectural applications.

For compact shipment and storage, Soft Line coils like a retractable tape measure. When uncoiled, the Soft Line becomes a 1.25" wide cupped aluminum channel that can be mounted at any angle between opposing wall, ceiling or floor surfaces in lengths up to 40 feet. This cupped form contributes to the luminaires' structural rigidity, acts as a heatsink, and also shields the LED light source and related wiring from view.

Using multiple runs of Soft Lines in varying lengths and angles creates a three-dimensional look that is as functional as it is visually interesting.

SOFT LINE INDIRECT LED LIGHTING SYSTEM, FEATURING SOFT STRIP

Description:

The Soft Line Indirect LED Lighting System provides soft ambient illumination for decorative and architectural applications. The suspended aluminum channel is available with warm-white and very warm-white commercial-grade (SS2C) or RGB Soft Strip, or with a combination of both. For compact shipment and storage, Soft Line coils like a retractable tape measure. When uncoiled, the Soft Line becomes a 1.25" wide cupped, rigid channel that spans between opposing walls, ceiling or floor surfaces. The field-cutable channel allows custom lengths up to 40 feet. This cupped aluminum form contributes to the luminaries structural rigidity, acts as a heat sink, and also shields the LED light source and related wiring from view. Adjustable turnbuckles support Soft Line, creating a 3-dimensional look that is as functional as it is visually interesting.

Applications:

Wherever an indirect light source can be used, including: indoor, kitchens, homes, offices, retail, hotels, clubs, displays, media room and conference rooms.

LED Soft Strip/Lamp:

Warm white (3079K) or very warm white (2700K) LEDs, 82+CRI LED lamps. For indirect color changing versions, see RGB Soft Strip on page 14

SL - Single Row of 24V SS2C Soft Strip; 2.5 LED watts per foot, delivering 214 lumens, SL provides 34 footcandles at desktop when mounted 1ft from 9 ft ceiling at 4 ft on center.

SLD - Double Row of 24V SS2C Soft Strip; 5 LED watts per foot, delivering 428 lumens, SLD provides 68 footcandles at desktop when mounted 1ft from 9 ft ceiling at 4 ft on center. Available with white, RGB, or a combination of both LEDs.

Power Supply:

75 watt, **TEB-75L-24DC**, 96 watt, **PSB-96W-010-24VDC** or 192 watt, **PSB-2X96W-010-24VDC**

INCLUDED MOUNTING HARDWARE

Power Feed & Non-Power Feed Turnbuckles support Soft Line on any angle from 0-60 degrees, feed power from one end and mount to a standard 4" square with round plaster ring electrical junction box.

Non-Powerfeed Turnbuckles support opposite end of Soft Line and mount to a ceiling, wall or floor. Turnbuckles come as a pair.

Soft Line Channel is a 1.25" wide cupped aluminum channel that can be mounted on any angle between opposing wall, ceiling or floor surfaces. Soft Line is field-cuttable, making it easy to configure custom lengths up to 40 feet.

Soft Line Standoff is a field-cuttable 24" long standoff that provides additional mounting options on opposing wall, ceiling or floor surfaces. Stem may be cut down to 4".

LIGHT CHANNELS

24VDC SYSTEMS (REMOTE POWER SUPPLY)

Edge Lighting's Light Channels are comprised of a slim, standard satin aluminum extrusion, with custom plated or anodized finish options, that acts as a housing and a heatsink for 24V Premium LED Soft Strip (SS2P) or 24V Commercial LED Soft Strip (SS2C). The Light Channels use a variety of lenses to achieve different beam spreads, maximum light levels, diffuse light, or dramatic grazing effects.

Which Light Channel is best for me?

Surface Mount Light Channel mounts to most surfaces for a linear line of light that looks great under/above cabinets and for cove lighting. To direct the light at a different angle, you can add a rotating mounting clip accessory or use the 45 degree extrusion option. Also available in an RGB version.

Millwork Light Channel recesses into 3/4" thick wood, making it ideal for task lighting under cabinets, in furniture, retail stores, libraries and closets.

Micro Grazer Light Channel creates dramatic grazing effects for walls up to 9 feet high; ideal when accentuating the texture of a vertical surface like a brick or stone wall, sheer curtains, and edge lit glass. Also available in an RGB version.

The Highest Quality Light

The Light Channel family offers you the option to choose between Premium and Commercial LED Soft Strip inside the channel for the illumination and lifespan you prefer.

Made to Order

All Light Channels are constructed and cut in the USA, making it easy for us to cut each system to more precise lengths to fit your specifications.

SURFACE MOUNT LIGHT CHANNEL 24V HIGH OUTPUT, PREMIUM CRI (80+) OR COMMERCIAL CRI (82+)
 MADE IN THE USA

Description:

The Surface Mount Light Channels feature 24 volt Soft Strip, inside a slim, paintable aluminum extrusion. LCSM uses SS2P with 3,000K warm-white, 80+CRI LEDs for excellent color-rendering. LCMSC uses SS2C with either 2,700K very warm-white or 3,000K warm-white, higher lumens, 82+CRI LEDs. The 61 degree white diffuser lens projects a clean line of light and eliminates LED dots, while the clear lens provides maximum light levels. The linear system is sold in 12 inch increments up to 120 inches. Customized lengths available in 2.4 inch increments (see spec sheet for ordering special lengths). Fixtures include mounting clips every 2 feet and can be linked end-to-end with plug-in or flexible connectors for a maximum of 40 feet. The system is powered by a dimmable, remote located power supply. Custom finishes available in satin aluminum, satin nickel, chrome, antique bronze and black. Fixtures include 5 year warranty.

Applications:

Indoor Only - Task lighting, under/above cabinet, cove, retail, closets.
 ETL listed to conform to UL 2108 for closet and under-cabinet applications.

Power Supply:

75 watt, **TEB-75L-24DC**; 96 watt, **PSB-96W-010-24VDC** or
 192 watt, **PSB-2X96W-010-24VDC**

Lamp:

MILLWORK LIGHT CHANNEL 24V HIGH OUTPUT, PREMIUM (80+) CRI OR COMMERCIAL (82+) CRI
 MADE IN THE USA

Description:

The Millwork Light Channel features 24 volt Soft Strip included inside a slim, paintable aluminum extrusion, which recesses into a minimum 3/4" thick wood boards. LCMW uses SS2P with 3,000K warm-white, high CRI (80+) LEDs for excellent color rendering. Millwork Light Channel Commercial uses SS2C with either 2,700K very warm-white or 3,000K warm-white, higher lumens, 82+CRI LEDs. The 61 degree white diffuser lens projects a clean line of light and eliminates LED dots, while the clear lens provides maximum light levels. The linear system consumes an average of 2.3 watts per foot and is sold in 12 inch increments up to 120 inches. Customized lengths available in 2.4 inch increments (see spec sheet for ordering special lengths). Fixtures include 4 spring clips per foot and can be linked with plug-in flexible connectors for a maximum of 40 feet. The system is powered by a dimmable remote located power supply. Custom finishes available in satin aluminum, satin nickel, chrome, antique bronze and black. Fixtures include 5 year warranty.

Applications:

Indoor Only - Task lighting, recessed under cabinet, furniture, steps, retail, libraries and closets

Lamp:

LCMW - 35 warm white (3,000K) LEDs per foot, 80+CRI
 LED lamps consume 2.3 watts per foot delivering 115 lumens
 LCMWC - 35 very warm white (2,700K) or warm-white (3,000K) LEDs per foot,
 82+CRI LED lamps consume 2.5 watts per foot

Average Lamp Life:

LCMW - 32,000 hours; LCMW - 50,000 hours

Power Supply:

75 watt, **TEB-75L-24DC**; 96 watt, **PSB-96W-010-24VDC** or
 192 watt, **PSB-2X96W-010-24VDC**

Dimming:

TEB power supplies use Lutron: Diva #DVELV-300P, Skylark #SELV-300P, Maestro #MAELV-600 24V; PSB power supplies use 0-10V dimmer Lightolier® Sunrise #ZP600FAM120. For controls and switches, see p. 13.

MICRO GRAZER LIGHT CHANNEL 7W 24V HIGH OUTPUT, **COMMERCIAL (82+) CRI**

MADE IN THE USA

Description:

The Micro Grazer Light Channel LED features 24 volt commercial-grade LEDs included inside a slim, paintable aluminum extrusion. The asymmetrical 10 degree lens is ideal for creating dramatic grazing effects. The linear system is sold in 12 inch increments up to 120 inches. Customized lengths available in 2.4 inch increments (see spec sheet for ordering special lengths). Mounting clips provided with each 2 foot section. Fixtures can be linked end-to-end with plug-in or flexible connectors for a maximum length of 12 feet. Each foot of Light Channel contains 2,700K very warm-white or 3,000K warm-white 82+CRI LEDs with excellent color rendering. Fixtures are powered by a constant voltage power supply, which is dimmable with a 0-10V dimmer. Includes 8 foot power feed cable. Custom finishes available in satin aluminum, satin nickel, chrome, antique bronze and black. Fixtures include 5 year warranty.

Applications:

Indoor Only - Highlight textured vertical surfaces, brick or stone walls, sheer curtains and edge lit glass

Power Supply:

96 watt, **PSB-96W-010-24VDC** or 192 watt, **PSB-2X96W-010-24VDC**

Lamp:

Very warm white (2,700K) or warm-white (3,000K) LEDs, 82+CRI, LED lamps consume 7 watts per foot delivering 342 lumens

Dimming:

Dimmable with 0-10V dimmer Lightolier® Sunrise #ZP600FAM120. For controls and switches, see p. 13.

SURFACE MOUNT LIGHT CHANNEL 2.6W, 24V HIGH OUTPUT, RGB
 MADE IN THE USA

Description:

The Surface Mount Light Channel RGB features 24 volt RGB Soft Strip inside a slim aluminum extrusion. RGB Soft Strip provides dynamic color effects with red, green and blue LEDs. The linear system is sold in 12 inch increments up to 120 inches. Customized lengths available in 4 inch increments (see spec sheet for ordering special lengths). Mounting clips provided every 2 feet. Fixtures can be linked end-to-end with plug-in or flexible connectors for maximum of 36 feet before refeeding the power. At 2.6 watts per foot, the system can be controlled using a compatible RGB 24 volt DC power supply with integrated RGB DMX driver. Includes 8 foot power feed cable. Custom finishes available in satin aluminum, satin nickel, chrome, antique bronze and black. Fixture includes 5 year warranty.

CIRRUS CHANNELS

ARCHITECTURAL 24VDC SYSTEMS (REMOTE POWER SUPPLY)

Edge Lighting's Cirrus Channels are the latest addition to the linear LED product line. The Cirrus Channels are available in five beautiful finishes with custom anodized or plated finish options. This family features high CRI (82+), a smaller profile than T5 fluorescent predecessors, running seamlessly up to 40' without dark spots. The exclusive Slim-Profile Channel Junction Box provides a narrow opening that is easily concealed by a fixture or small cover for a clean, finished appearance.

Which Light Channel is best for me?

Cirrus Channel D1 features a direct 1" lens with 100° beam spread.

Cirrus Channel S1 features a square 1" lens with 105° beam spread.

Cirrus Channel Wall Wash uses an asymmetrical lens to angle the light onto a wall with even illumination.

Cirrus Channel Suspension is ideal for high ceiling applications or suspended over a kitchen island, conference table, or anywhere a long, linear suspension is needed. The 5.5 watt suspension is available up to 17 feet, while the 2.4 watt version extends up to 40 feet. Cirrus is powered by a remote class 2 power supply, which must be mounted within 40 ft of junction box.

Better Than Fluorescent

When compared with a T5 HO fluorescent and the DOE Caliper testing, the 5.5 watt Cirrus Channels meet the guidelines and offer a comparable solution in terms of light output, or lumens per watt, while providing twice the lamp life.

CIRRUS D1

CIRRUS S1

CIRRRUS WALL WASH

CIRRUS SUSPENSION

CIRRUS CHANNEL, DIRECT 1" LENS 24VDC SYSTEM - 82CRI
 MADE IN THE USA

Description:

The Cirrus Channel features a direct 1" (D1) flat linear lens with 100 degree beam spread. At 2.5 or 5.5 watts per foot, the 24 volt DC channel contains very warm white 2,700K or warm white 3,000K 82 CRI LEDs. It includes a split floating canopy, which mounts on standard junction box anywhere in the run or may be ordered with a Slim Profile Channel Junction Box (C-1RE-JBOX). Cirrus is powered by a Class 2 remote power supply up to 40 ft away. The system is available from 12 inches up to 204 inches/17 feet (5WDC) or up to 480 inches/40 feet (2WDC). Customized lengths available in 2.4 inch increments (see spec sheet for ordering special lengths). Lengths greater than 120 inches will ship as two or more sections of equal lengths. Fixtures are covered by a 5 year warranty. Custom finishes available.

Finishes:

Satin Nickel, Chrome, Antique Bronze, Satin Aluminum, White and Black; Custom finishes also available.

Applications:

Architectural lighting, general lighting, retail and outdoor applications

Lamp:

Warm white (2,700K or 3,000K) LEDs, 82 CRI
 47 lumens per watt; 318 lumens per foot; 2544 lumens per 8ft section
 LED lamps consume 2.5 watts (2WDC) or 5.5 watts (5WDC) per foot

Average Lamp Life:

50,000 hours

Power Supply:

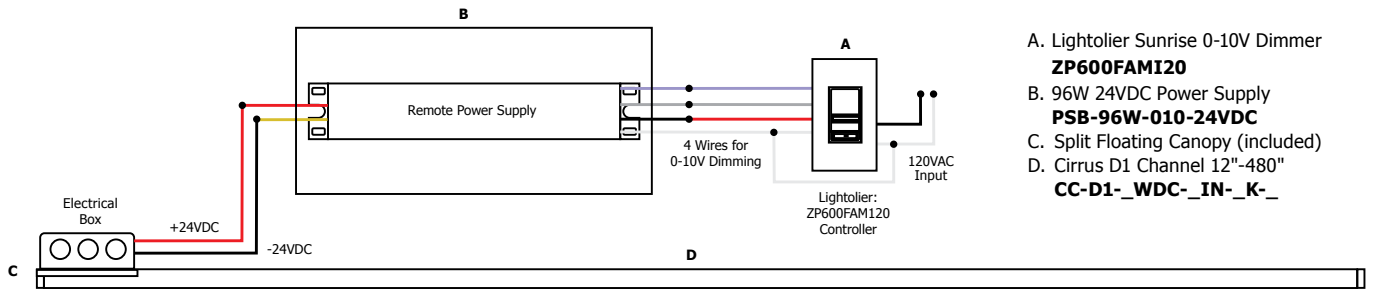

Class 2, 24VDC output: 120V input, PSB-25W-010-24VDC;

CIRRUS CHANNEL, WALL WASH LENS 24VDC SYSTEM - 85CRI
MADE IN THE USA

Description:

The Cirrus Channel features a Wall Wash lens. At 7.5 watts per foot, the 24 volt DC channel contains very warm white 2,700K or warm white 3,000K 85 CRI LEDs and mounts 18" to 24" from wall. The Wall Wash includes a split floating canopy, which mounts on standard junction box anywhere in the run or may be ordered with a Slim Profile Channel Junction Box (C-IRE-JBOX). The channel is powered by a Class 2 remote power supply up to 40 ft away. The system is available from 12 inches up to 144 inches/12 feet. Customized lengths available in 2.4 inch increments (see spec sheet for ordering special lengths). Lengths greater than 120 inches will ship as two sections of equal lengths. Fixtures are covered by a 5 year warranty. Custom finishes available.

Finishes:

Satin Nickel, Chrome, Antique Bronze, Satin Aluminum, White and Black; Custom finishes also available.

Applications:

Wall wash, general lighting and outdoor applications.

Lamp:

Warm white (2,700K or 3000K) LEDs, 85 CRI
36 lumens per watt
LED lamps consume 7.5 watts per foot

Average Lamp Life:

50,000 hours.

Power Supply:

Class 2, 24VDC output: 120V input, PSB-25W-010-24VDC;
120-277V input, PSB-96W-010-24VDC; PSB-2X96W-010-24VDC

Dimming:

Dimmable with 0-10V dimmer using power supplies above: Lightolier® Sunrise #ZP600FAM120, 0-10V dimmer recommended.

CIRRUS CHANNEL SUSPENSION, DIRECT 1" LENS 24VDC SYSTEM

MADE IN THE USA

Description:

The Cirrus Suspension features a direct 1" (D1) flat linear lens with 100 degree beam spread. At 2.5 or 5.5 watts per foot, 24 volt DC suspension contains very warm white 2,700K or warm white 3,000K 82CRI LEDs. The Cirrus Suspension, with square canopy, includes a 12 ft power cable (for every run) and suspension cables. It feeds power at the end using a standard junction box and must be wired into a Class 2 remote power supply up to 40 ft away. The system is available from 12 inches up to 204 inches/17 feet (5WDC) or up to 480 inches/40 feet (2WDC). Customized lengths available in 2.4 inch increments (see spec sheet for ordering special lengths). Lengths greater than 120 inches will ship as two equal segments. All cables and hardware have a satin nickel finish. Fixtures are covered by a 5 year warranty. Custom finishes available.

Finishes:

Satin Nickel, Chrome, Antique Bronze, Satin Aluminum, White and Black; Custom finishes also available.

Applications:

Indoor - Architectural lighting, general lighting and retail.

Lamp:

Warm white (2,700K or 3,000K) LEDs, 82 CRI
47 lumens per watt; 318 lumens per foot; 2544 lumens per 8 ft section
LED lamps consume 2.5 watts (2WDC) or 5.5 watts (5WDC) per foot

Average Lamp Life:

50,000 hours.

Power Supply:

LIGHTING FIXTURES AC

Edge Lighting's AC Lighting fixtures are an exciting addition to the linear LED product collection. The exclusive 24VAC power supply is small enough to fit inside a standard 4" junction box, eliminating the need for remote power supplies and additional wiring.

Which AC Lighting Fixture is best for me?

Cirrus Float is a linear suspension that uses a direct 1" lens and is available in lengths between 36" and 72". Choose between a center feed or end feed option.

Twiggy D1 features a slim, straight profile, inspired by 1960's model, Twiggy, with a direct 1" lens that provides uniform, white light. The Twiggy D1 mounts on a rotating hinge, allowing you to adjust the angle of light to your desire.

Twiggy S1 features a slim, straight profile, with a square 1" lens that emits light out of the sides. The Twiggy Square S1 mounts flat on the wall.

Bardot Vanity features a smooth, curved body, inspired by Brigitte Bardot, which projects uniform white light at a 45° angle, perfect for bathroom lighting.

Audrey features an angled, geometric body, inspired by Audrey Hepburn, which projects uniform white light at a 45° angle, perfect for bathroom lighting.

The New Hollywood Lights

The Twiggy, Bardot and Audrey offer dimmable LED vanity lighting that eliminates shadows and provides the perfect very warm-white illumination to accentuate skin tones. The 2,700K color mimics the softer look of incandescent lighting yet with the efficiency of LED lighting at only 7 watts per foot.

Slim Profile J-Box

Fixture Hides Slim Profile Junction Box Opening. No Canopy Cover Required.

Transformer Fits in Junction Box.
