e-cono light®
Guide to RUUD Products
Narrow Spotlight (Same as PN Series from RUUD Lighting)

Applications: Illuminates flags up to 20’ (150W PSMH) and 20’-40’ (400W PSMH)

Features:
- 120/208/240/277V HPF ballast
- Seamless, die-cast aluminum housing
- Medium bronze finish
- Rigid aluminum frame with high-impact tempered glass lens
- UL listed for wet locations
- 5-year finish, 3-year fixture, and 1-year lamp warranty

### Applications:
- Illuminates flags up to 20’ (150W PSMH) and 20’-40’ (400W PSMH)

### Features:
- 120/208/240/277V HPF ballast
- Seamless, die-cast aluminum housing
- Medium bronze finish
- Rigid aluminum frame with high-impact tempered glass lens
- UL listed for wet locations
- 5-year finish, 3-year fixture, and 1-year lamp warranty

No Mounting Hardware
(see above for mounting options)

Accessories: (No combination of Wire Guard or Backlight Shield can be used)
Premium Compact Floodlight (Same as NS Series from RUUD Lighting)

Applications: Building facades, displays, uplighting and signs. Also effective as security lighting, for storage areas and commercial sites.
Typical Mounting Height: 8 to 20 feet

Features:
- Seamless die-cast aluminum housing
- Die-cast aluminum lens frame with silicone gasket, provide complete seal
- Clear, double-strength heat-tempered glass lens
- Included adjustable fitter allows for directional aiming in 5° increments. Threaded lower fitter mounts to 1/2"-14 NPSM knockout.
- E-coat epoxy primer with five layers of protection
- Super durable dark- or medium-bronze powder topcoat
- UL Listed for wet locations
- 5-year finish warranty
- 3-year fixture warranty
- 1-year lamp warranty
- Assembled in the USA

Accessories: (No combination of Wire Guard, Deep Baffle, or Glare Shield can be used.)

## Approximate Maximum Wind Zones For Premium Poles

This map indicates approximate maximum wind zones throughout the United States. Base wind velocities are established using a 50-year recurring mean. The EPA rating of the pole must be equal to or greater than that of the fixture(s), taking into consideration the wind conditions at the job site. Pole and fixture EPA ratings are on page 8.

**NOTE:** When selecting poles for geographic areas with winds or EPAs exceeding our published data, please consult a local civil engineer with the information from our catalog before ordering.

**NOTE:** EPA ratings for RUUD Lighting poles are rated for use with Road Lighting fixtures only. It is the sole responsibility of the customer to carefully select poles based upon the proper mounting configuration and the wind loading of the area where the installation will occur.

### Canada Wind Speeds

#### Effective Projected Area (EPA) Ratings - Tenons & Brackets

**WHY IS EPA IMPORTANT?**

Effective Projected Area—or EPA—is a rating assigned to a pole-mounted lighting fixture based on the fixture or pole’s surface area and shape. The EPA is used to calculate wind loading to determine the proper pole size needed to support a fixture in outdoor applications. EPA maps (as seen on pages 78 and 86) indicate approximate maximum wind zones throughout the United States. Base wind velocities are established using a 50-year recurring mean.

Note that the wind map has several shaded areas designated as Special Wind Regions. In these areas, the magnitudes of the local wind speeds are dramatically affected by local conditions. These special wind regions include mountainous terrain, gorges, and other geographic areas that produce exceptional wind velocities. Poles located in a special wind region may be subjected to wind speeds that are higher than those indicated in the surrounding area. Wind speeds in these special regions should be determined by consulting the authority with local jurisdiction in that particular area, or through the analysis of local meteorological conditions.

**NOTE:** Hanging signs, banners and flags on poles change the EPA rating and increase vibration. The EPA ratings data provided in this catalog does not allow for this added stress which could result in pole or fixture failure.

**NOTE:** Pricing for Ruud poles does not include freight or qualify for free shipping. Contact customer service at 888-243-9445 for actual freight charges.
SQUARE INTERNAL - VERTICAL

Steel (E-PB Series) The square base of the PB Series bracket is designed to be inserted into a square, non-tapered pole. (When ordering, specify the appropriate pole width). The multiple PB Series brackets are supplied with snap-on end caps to enclose the wiring chamber. The PB Series brackets are constructed of square steel tubing. Fixtures mounted to these brackets can be adjusted both vertically and horizontally.

Pole Tenons - Fixture Mounting Brackets (Medium Bronze)

**ROUND EXTERNAL MOUNT**

(E-PT Series) The round base of the cast aluminum E-PT Series bracket is designed to mount over a round pole or tenon ranging in size from 2 3/8” to 3” O.D. The E-PT Series brackets can be mounted on a square pole but require use of the Single Vertical Tenon (E-PB1). Fixtures mounted to these brackets can only be adjusted vertically.

**SQUARE INTERNAL - HORIZONTAL**

(E-PD Series) The square base of the E-PD Series aluminum bracket is designed to be inserted into square, non-tapered 4-inch steel or aluminum poles. Die formed end cap is supplied to enclose the wiring chamber. Fixtures mounted to these brackets can only be adjusted vertically.

**Features:**

- Durable and seamless die-cast aluminum housing
- Rough-in 12.3” square hole required for fixture installation
- Includes four adjustable steel “L” brackets for mounting to various ceiling thicknesses
- Large wiring compartment with access from above or below the ceiling line, for ease of field wiring
- Four (2 in – 2 out) #12AWG (90°C) through-branch circuit conductors
- Specular aluminum reflector
- Lens assembly consists of rigid aluminum frame with white ultra-durable powder topcoat and high-impact, #P73 crystal tempered glass
- HID fixtures are provided with an insulation detector, which will deactivate fixture if inadvertently covered with insulation
- UL Listed for wet locations
- 5-year finish warranty, 3-year fixture warranty, 1-year lamp warranty
- Assembled in the USA

**Applications:** Security, entryway and perimeter lighting. Also recommended for parking garages, shopping area walkways and exterior canopies.

**Typical Mounting Height:** 8 to 18 feet
**Typical Spacing:** 1 to 1.5 times the mounting height

**Accessories:**

- **2x2 Lay-In Panel**
  - CAT.# E-RC3/LP12.............$47.99
  - Field-installed Lay-in Panel supports the fixture while replacing a standard 24” square recessed ceiling tile. Steel panel finished with a white durable powder coat paint.
Premium Canopy Light (Same as CLO Series from RUUD Lighting)

Applications: Security, entryway and perimeter lighting. Also recommended for parking garages, shopping area walkways and exterior canopies.
Typical Mounting Height: 8 to 25 feet Typical Spacing: 1 to 1.5 times the mounting height

Features:
- Durable and seamless die-cast aluminum housing with super durable white powder topcoat
- Fixture is designed for direct mount over a recessed junction box
- Two 1/2" conduit openings provided for wire supply
- Surface Box is required for 150W PSMH when mounting to combustible surface such as plaster or drywall
- Surface Box comes standard for 250W PSMH and HPS fixtures
- Lens assembly consists of rigid aluminum frame and high-impact, #P73 crystal tempered glass
- Specular aluminum reflector
- E-coat epoxy primer with five layers of protection
- UL Listed for wet locations
- 5-year finish warranty
- 3-year fixture warranty
- 1-year lamp warranty
- Assembled in the USA

  CAT.# E-CS4/WG (Large).......$10.99

PRODUCTS THAT MEET BUY AMERICAN REQUIREMENTS WITHIN ARRA ARE DESIGNATED BY THIS SYMBOL.
Premium Rectangular Soffit Light (Same as E1 Series from RUUD Lighting)

Applications: Security, pathway and perimeter lighting; ideal for entry ways, walkways and corridors.

Typical Mounting Height: 8 to 20 feet
Typical Spacing: 2 to 3 times the mounting height

- Durable die-cast aluminum housing
- Neoprene gasket on back of housing provides a watertight mounting seal
- Silicone rubber seal between housing and lens ensures a watertight seal
- Steel fixture mounting bar and threaded nipple provide direct mounting to recessed J-box
- White polycarbonate lens is fastened to housing with phillips-head captive stainless-steel screws

Surface Mounting Box Accessories available (see page 17).

Premium Square Low-Profile Canopy Light (Same as SS Series from RUUD Lighting)

Applications: Security, pathway and perimeter lighting; ideal for entry ways, walkways and corridors.

Typical Mounting Height: 8 to 20 feet
Typical Spacing: 2 to 3 times the mounting height

- Meets Americans with Disability Act Accessibility Guidelines (ADAAG)
- Translucent polycarbonate lens
- Knockouts are provided for 1/2” conduit entry, mounting over single gang J-box, 4” square or 4” octagonal J-boxes
- 120-277V universal electronic ballast (E-CSF2 only)
- UL Listed for wet locations
- 5-year finish warranty, 3-year fixture warranty, 1-year lamp warranty
- Assembled in the USA

Features:

- Medium Bronze Catalog #: E-SR1F42UM
- Dark Bronze Catalog #: E-SR1F42UZ

60W Incandescent version available online! CAT#: E-SR1001, $31.99

60W Induction version available online! CAT#: E-SR1002, $31.99
Premium Square Soffit Light (Same as SE1 Series from RUUD Lighting)

Applications: Security, entryway and perimeter lighting; ideal for entryways, walkways and corridors

Typical Mounting Height: 8 to 15 feet
Typical Spacing: 2 to 3 times the mounting height

Features:
- Durable die-cast aluminum housing
- Knockouts provided on back of housing for 1/2” conduit entry, mounting over a 4” square or octagonal and single gang J-boxes
- 1/2” NPT threaded hubs on three sides for conduit entry-Small Housing
- 1/2” NPT threaded hubs on four sides for conduit entry-Large Housing
- Neoprene gasket on back of housing provides a watertight mounting seal
- Sponge cord gasket between housing and lens ensures a watertight seal
- White polycarbonate lens held in place with hidden spring clip assembly
- 120/208/240/277V HX ballast NP
- E-coat epoxy primer with five layers of protection
- Super durable medium-bronze powder topcoat
- UL Listed for wet locations
- 5-year finish warranty, 3-year fixture warranty, 1-year lamp warranty
- Assembled in the USA

One lamp included for PSMH & HPS

Fluorescent lamp ordered separately.
Premium HID Cutoff Wall Pack (Same as GWC Series from RUUD Lighting)

Applications: Security, pathway and perimeter lighting; ideal for entry ways, walkways and parking facilities.
Typical Mounting Height: 8 to 30 feet  Typical Spacing: 2 to 3 times the mounting height

Features:
- Seamless copper-free die-cast aluminum housing
- Copper-free die-cast aluminum lens assembly and frame is hinged, allowing for easy serviceability
- Clear, borosilicate glass lens
- Foam-in-place gasketing around lens and mounting provide watertight seal
- Precision specular aluminum reflector provides forward throw with wide distribution
- Fixture design provides cutoff light distribution without glare
- Supplied with lightweight mounting box designed for installation over standard 4-inch square or octagonal and single-gang J-boxes
- Conduit entry from top, sides and rear for easy through-wiring
- E-coat epoxy primer with five layers of protection
- Super durable dark-bronze powder topcoat
- UL Listed for wet locations
- 5-year finish warranty
- 3-year fixture warranty
- 1-year lamp warranty
- Assembled in the USA

Accessories:
- Photocell
