Black Body Dimming

Tunable White

The ultimate expression of precision lighting

Aculux® 3-1/4" LED precision recessed luminaires – now featuring black body dimming and tunable white technologies – respond to your needs like no other light source. They deliver unsurpassed design freedom and the ability to meet every lighting challenge.

With these new technologies, Aculux luminaires have once again elevated the art of precision lighting, augmenting an already powerful set of features that include Acu-Aim™ gear-driven optics, the Tru-Line™ adjustable platform, and the auto-adjusting optic holder. Add to that nearly endless round and square trim possibilities and you have the most advanced luminaire in the industry with the most sophisticated and precise lighting control ever offered.

Introducing the interactive luminaire that responds to your every need

Aculux 3-1/4" LED precision recessed luminaires are renowned for the superb level of control they offer in the design and installation of high-end recessed lighting applications. No other luminaire provides as many tools to express your vision. Now with the introduction of black body dimming and tunable white technologies, Aculux luminaires give you the ability to interact with your environment to achieve the precise lighting effects you desire.

LED Black Body Dimming & Tunable White

Instant response at your fingertips

Black Body Dimming

In black body dimming mode, Aculux 3-1/4" LED luminaires warm as they dim, perfectly mimicking everything you love about halogen dimming ... but with only one-quarter of the power consumption.

Tunable White

In tunable white mode you can adjust the color temperature anywhere between 4350K and 2000K while remaining on the black body locus. With this exciting new technology, you can easily create the atmosphere and effects you desire on a post-installation basis. And you can respond to changes in lighting requirements or design without replacing luminaires or components.

Precise Optical Control

The foundation of Aculux LED's unsurpassed performance rests on an advanced multi-channel light engine coupled with a proprietary optical system. The patent-pending optical system provides excellent in-beam color uniformity and precise beam control. Optimized center beam optics maximizes light output when LED optic is aimed off nadir, maintaining quiet apertures and eliminating glare at any aiming angle. Interchangeable optics are available in 36° flood, 27° narrow flood, or 21° very-narrow flood.

Superior Color Consistency and Rendering

Aculux LED with black body dimming and tunable white technology renders colors supremely well with 90 CRI at 3000K and 85 CRI throughout the CCT range. With an R9 value of 70, these luminaires produce strong, vibrant reds prevalent in skin tones, clothing, and artwork. The intelligent LED driver with closed-loop feedback maintains light intensity and stable color point over temperature, staying within a 2-step MacAdam ellipse of the black body locus across the entire color temperature range.

Intelligent LED Driver with Closed-loop Feedback

Black Body Dimming & Tunable White

Taking Control of Thermal Management

Another Aculux innovation – the Dual-Mesh™ heat sink – provides superior thermal management, ensuring long LED life and helping maintain stable color points. This new patent-pending, passive heat sink design is substantially more efficient at transferring heat away from the LED light engine than traditional passively cooled heat sinks.

Leading the way in performance and efficiency

Elegantly discreet 3-1/4" aperture; exceptional luminous flux of 700 or 1000 lumens; energy-saving efficacies up to 50 lm/W ... Aculux LED offers industry leading performance. With the addition of black body dimming and tunable white technologies, they provide a level of interactivity, responsiveness, and control never before possible.

The most advanced luminaire in the industry with the most sophisticated and precise lighting control ever offered.

LED Black Body Dimming

LED Black Body Dimming

Responding to your mood

Experience the warmth of halogen lighting without having to accept the high energy consumption and short service life of halogen. With black body dimming technology, Aculux LED luminaires can perfectly mimic halogen dimming while consuming just one-fourth the energy and lasting about 15-times longer. Residential, commercial, hospitality ... now your lighting can respond to any mood you wish to create. Aculux LED dimming follows the black body locus within a 2-step MacAdam ellipse throughout the entire dimming range. You get the look of halogen dimming with all the benefits of LED lighting, plus superb color consistency from fixture to fixture.

- 3000K to 1800K dimming range mimics the warmth of halogen
- CCT vs. Intensity replicates the halogen dimming profile
- Dimming stays within a 2-step MacAdam ellipse of the black body locus
- Standard 0-10V dimming protocol offers <1% dimming
- 90 CRI at 3000K and 85 CRI/70 R9 throughout the entire dimming range

Black Body Dimming Mode

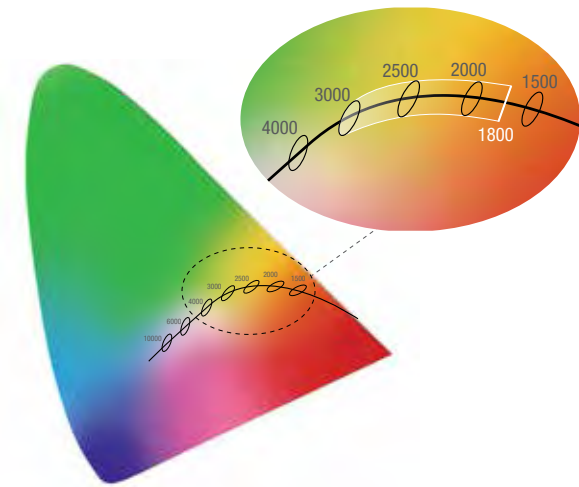

Aculux LED dimming responds to your every mood, creating a warm, halogen-like atmosphere with a simple control. All it takes is a standard 0-10V protocol dimmer or dimming system to interact with this remarkable technology.

LED Black Body Dimming

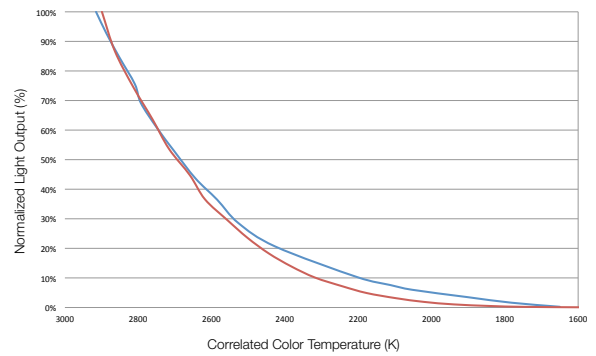

Black Body Dimming

Color temperature warms from 3000K - 1800K when dimmed staying within a 2-step MacAdam ellipse of the Black Body Locus.

Aculux vs. Halogen

Aculux Black Body dimming technology perfectly mimics halogen as the color temperature warms from 3000K to 1800K as it is dimmed.

Key:

- Halogen
- Aculux® LED Black Body Dimming

The Aculux LED Luminaires in the black body dimming mode transforms any room to a warm evening glow.

LED Tunable White

Responding to your changing environment

Aculux LED luminaires with tunable white technology enable you to select any color temperature along the black body locus between 4350K and 2000K. This means you can respond to the lighting requirements of post-installation interior design changes without ever having to replace luminaires, light engines, or components. With a single luminaire, you can select a warmer color temperature to complement wood flooring or a cooler temperature to enhance the colors in artwork or textured surfaces. A standard 0-10V dimming protocol puts total CCT control at your fingertips ... you will never be limited by CCT-specific luminaires again. Warm or cool, Aculux LED with Tunable White technology will respond by maintaining the selected CCT as it delivers the superior color consistency and color rendering you desire.

- CCT range of 4350K to 2000K eliminates being locked-in to a specific CCT
- Target CCTs stay within a 2-step MacAdam ellipse of the black body locus
- Standard 0-10V signal for CCT control
- Dimming to <1% with standard 0-10V protocol
- 85 CRI with R9 of 70 throughout the CCT range

Tunable White Mode

Aculux LED with Tunable White technology provides more design freedom than ever before. A standard 0-10V protocol dimmer or dimming system provides CCT control at a fixed light output. If dimming is desired, connect a second 0-10V protocol dimmer and achieve unprecedented luminaire control.

LED Tunable White

LED Tunable White

Tunable White Light

Color temperature can be tuned from 4350K to 2000K while staying within a 2-step MacAdam ellipse of the Black Body Locus.

A single luminaire has never before been so responsive and interactive.

Use a dimming system to control and enhance the lighting environment when cool and warm colors are specified. Tune CCT to a warm color temperature to enhance the richness of the wood floors, while layering in luminaires set to a cooler color temperature to accent blues and grays in the artwork and textured walls.

Responding to your needs ... before, during, and after installation

Aculux 3-1/4" LED recessed luminaires with black body dimming and tunable white technology puts you in total control of every aspect of a lighting project. In the design phase, you have all the high-precision, high-performance features and options Aculux is renowned for. In addition, Aculux luminaires offer numerous features to aid during installation, ensuring your lighting design intent is realized. And after installation, you are provided with precision optics and powerful control capabilities to respond to changing requirements. It's responsive, it's interactive, and it's all built-in to a single luminaire.

Patent Pending Dual-Mesh™ passive heat sink provides superior thermal management, resulting in long LED life and stable color point over temperature.

Advanced Multi-Channel LED Light Engine renders colors exceptionally and delivers brilliant white light within a 2-step MacAdam ellipse of the black body locus.

Acu-Aim™ Precision Geared Aiming provides pinpoint accurate aiming and is comprised of two aiming features:

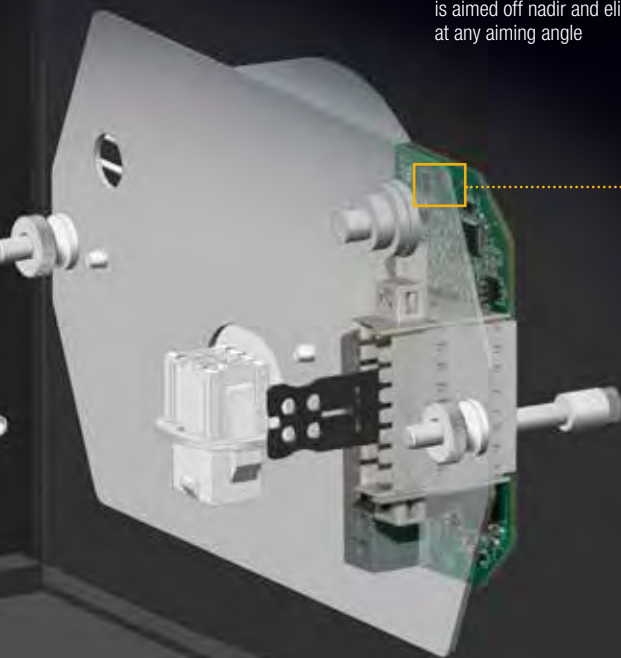

1. Exclusive 370° gear rotation fully eliminates any dead spots in a lighting application
2. Precision, gear-driven 45° vertical adjustment is smooth and effortless with the turn of a screwdriver.

Optimized Center Beam Optics
Maximizes light output when LED optic is aimed off nadir and eliminates glare at any aiming angle

Intelligent LED Driver with closed loop feedback system maintains color consistency and light output over temperature. The driver automatically determines if the luminaire should be in black body dimming mode or tunable white mode based on how the luminaire is wired.

Patent Pending Optical System provides efficient color mixing for superb in-beam color uniformity. The three field interchangeable optics have excellent beam control in 21°, 27° and 36°. And, the spring-loaded optic holder can accept up to three media and maintain the reflector/optic relationship.

Patented Tru-Line™ Platform

V-Notch Sight
Enables the installer to accurately align the fixtures during initial installation. (Applies to both round and square apertures.)

Square-Aperture Rotation
Square apertures can be rotated up to 90° to help align the fixture apertures prior to finishing the ceiling

Aperture Translation
Permits +/- 1/2" translation adjustment to ensure fixture-to-fixture alignment prior to finishing the ceiling. (Applies to both round and square apertures.)

3-1/4" LED Adjustable Luminaires, Round

700 and 1000 Lumens

The Aculux® 3-1/4" LED Adjustable Black Body Dimming and Tunable White luminaires feature both technologies. Choose from 700 or 1000 nominal lumens. The ultra-efficient, sealed Air-Loc® luminaires have efficacies up to 50 lm/W and can be installed in IC or Non-IC installations. Luminaires are UL/cUL listed and damp location approved (wet location with selected lensed trims).

Ordering Information: Housing, trim and accessories are ordered separately. **Example:** IC43T-W-V-U

3-1/4" LED Adjustable Luminaires, Square

700 and 1000 Lumens

The Aculux® 3-1/4" LED Adjustable Black Body Dimming and Tunable White luminaires feature both technologies. Choose from 700 or 1000 nominal lumens. The ultra-efficient sealed Air-Loc® luminaires have efficacies up to 50 lm/W and can be installed in IC or Non-IC installations. Luminaires are UL/cUL listed and damp location approved (wet location with selected lensed trims).

Ordering Information: Housing, trim and accessories are ordered separately. **Example:** IC43TSQ-W-V-U

Housing			Beam Optics	Drivers	Options
700 Lumens, 13W			V – 21° Very Narrow Flood N – 27° Narrow Flood F – 36° Flood	U – 120-277V, with optional 0-10V Dimming	CP – Chicago Plenum
IC43TSQ-W IC Rated 	IC943TSQ-W IC Rated 				
1000 Lumens, 20W			V – 21° Very Narrow Flood N – 27° Narrow Flood F – 36° Flood	U – 120-277V, with optional 0-10V Dimming U1 ¹ – 120V, 0-10V Dimming U2 ¹ – 277V, 0-10V Dimming	CP* – Chicago Plenum * Not available on IC49TSQ Housing
IC49TSQ-W IC Rated 	TC49TSQ-W Non-IC Rated 	TC949TSQ-W Non-IC Rated 			

Mounting Accessories:

Catalog #	Description
CTA4SQ-125	7/8" – 1-1/4" ceiling adapter
CTA4SQ-163	1-1/4" – 1-5/8" ceiling adapter
CTA4SQ-200	1-5/8" – 2" ceiling adapter
FMASQ4	Flush mount adapter required for drywall flush mount trim installations
FMASQ4-SC100-WH	Flush mount adapter for wood, stone, tile, 1/2" - 1" thick ceiling, White.
FMASQ4-SC100-BL	Flush mount adapter for wood, stone, tile, 1/2" - 1" thick ceiling, Black.
FMASQ4-SC138-WH	Flush mount adapter for wood, stone, tile, 1" - 1-3/8" thick ceiling, White.
FMASQ4-SC138-BL	Flush mount adapter for wood, stone, tile, 1" - 1-3/8" thick ceiling, Black.
FMASQ4-SC175-WH	Flush mount adapter for wood, stone, tile, 1-3/8" - 1-3/4" thick ceiling, White.
FMASQ4-SC175-BL	Flush mount adapter for wood, stone, tile, 1-3/8" - 1-3/4" thick ceiling, Black.
EMI-20	20W Emergency lighting inverter

Optical Accessories:

Light Control Lenses/Films

These alter the light distribution of a given lamp, enlarging or elongating it, softening the beam edge or removing striations.

Uniformity Lens	T7421
Diffusion Lens	T7420
Prismatic Spread Lens	T7477
Linear Spread Lens	T7478
50° Optical Film	AF3-50DEG
